Academic Details

JSPM's Jayawant Rao Sawant College of Engineering

BE in Computer Engineering

Cumulative GPA: 9.35 / 10

2023 – 2027

Pune, India

Girme Junior College

12th — HSC (Science)

2021 – 2023

Pune, India

- Percentage: **71.7%**

The Bishops Co-Ed School, Undri

10th — ICSE

2021

Pune, India

- Percentage: **96.4%**

Technical Skills

Programming Languages (with Proficiency):

Python — *Advanced* | Java — *Intermediate* | JavaScript — *Advanced* | C — *Intermediate* | SQL — *Intermediate*

Technologies & Frameworks:

ReactJS, Node.js, Express.js, Tailwind CSS, Socket.io, LangChain, REST APIs, JWT, Chart.js

Tools & Platforms:

Git, GitHub, Postman, VS Code, Mapbox, Cloudinary, Pinecone, npm

Databases: MongoDB, PostgreSQL, MySQL, Firebase | *Cloud & Deployment:* Amazon Web Services (AWS), Vercel, Render

AI / ML: OpenAI API (GPT-4), OpenAI Moderation API,

Operating Systems: Windows, Linux (Ubuntu)

Concepts: DSA, DBMS, OOPs, Network Security, JWT,

Mini Projects

Spotify Clone | HTML, CSS, JavaScript

- Built a static front-end clone of Spotify featuring a music player UI with playlist navigation, play/pause controls, progress bar, and volume slider using vanilla HTML, CSS, and JavaScript.
- **Contribution:** Sole developer — designed layout, implemented audio playback logic and dynamic track switching.
- **Outcome:** Strong foundation in DOM manipulation and responsive UI design.

Weather Monitoring Dashboard | JavaScript, OpenWeather API, HTML, CSS

- Developed a real-time weather dashboard fetching live data via the OpenWeather API, displaying temperature, humidity, wind speed, and 5-day forecast with a clean responsive UI.
- **Contribution:** Full implementation including API integration, error handling, and UI design. **Outcome:** Hands-on experience with REST API consumption and asynchronous JavaScript.

To-Do List App | React, LocalStorage, CSS

- Created a task management app with add, edit, delete, and mark-complete features; data persistence via LocalStorage and filtering by status (All / Active / Completed).
- **Contribution:** End-to-end development. **Outcome:** Solidified understanding of React state, hooks, and component architecture.

Major Projects

SmartHire MERN Stack, OpenAI GPT-4, LangChain, Pinecone, Tailwind CSS	GitHub
- Full-stack AI-powered job portal with GPT-4 resume scoring and Pinecone semantic search engine matching candidates to job descriptions via skill embeddings. Role: Full-stack developer — built role-based portals (Candidate / Employer / Admin), JWT auth, and Chart.js analytics dashboard. Result: End-to-end hiring pipeline with AI-driven shortlisting.	
NexFeed — Social Media App MERN Stack, Firebase, Socket.io, Cloudinary	GitHub
- Production-grade social platform with real-time notifications (Socket.io), Cloudinary CDN media uploads with WebP conversion reducing load time by ~40%. Role: Full-stack developer — integrated OpenAI Moderation API for content safety; implemented infinite-scroll feeds with pagination and in-memory caching.	
Zerodha Clone — Stock Trading Platform MongoDB, Express.js, React, Node.js	GitHub
- Full-stack stock trading platform replicating Zerodha with user authentication, live market data simulation, and portfolio tracking. Role: Full-stack developer — built RESTful APIs, JWT auth, and React UI. Result: Scalable trading platform with real-time MongoDB updates.	
Wanderlust — Hotel Discovery Platform Node.js, Express.js, MongoDB, Mapbox, Cloudinary	GitHub
- Dynamic hotel listing platform with real-time CRUD, Mapbox GL interactive pins, Cloudinary image uploads, star ratings, and sentiment-tagged reviews. Role: Full-stack developer — built server-side filters, geospatial indexing for proximity search, and responsive HTML/CSS/JS frontend. Result: Fully functional hotel discovery app.	

Certifications

MERN Stack Development — Apna College	2024
ReactJS — Apna College	2024
NodeJS with Express & MongoDB — Udemy	2024
MongoDB Basics — MongoDB University	2023
Java Programming — Apna College	2025
SQL — Coursera	2024
Google UX Design Professional — Coursera	2023

Internships

Full Stack Development Intern	2026
<i>ShadowFox Online</i>	<i>1 Month</i>
- Developed and deployed full-stack web features under mentorship, working with the MERN stack to build responsive UI components and RESTful API endpoints. - Collaborated on real-world project tasks including database schema design, authentication flows, and frontend state management; gained industry exposure to agile workflows and code review practices.	

Technical Achievements

Smart India Hackathon (SIH) 2025 — <i>Participated</i> National Level	2025
Google AI Hackathon — <i>Participated</i> National Level	2025
MIT Kurukshetra National Level Hackathon — <i>Participated</i> National Level	2025
Smart India Hackathon (SIH) 2024 — <i>Participated</i> National Level	2024

Extracurricular Achievements

Classical Dancing — Kathak — Achieved various awards at college and regional level	—
Volunteer — College cultural and social events, contributing to event organization	—
